

For safety, stability and performance in tough conditions there is only one mower to consider

Grillo® Climber

ON THE FARM

"I use it because I can mow places I can't even take my tractor"

IN THE GARDEN

"The wide deck on the Magnum gives me a quality finish"

ON THE LIFESTYLE BLOCK

"When I mow my country property the grass is always long"

Grillo Climber

For safety, stability and performance in tough conditions there is only one range to consider – Grillo Climber: a comprehensive line up of quality Italian machines that will extend your mowing beyond the normal limits that other ride on mowers provide.

Available in both 7 Series for smaller lifestyle properties and the rugged 9 Series for larger blocks, Grillo Climbers will effectively mow down over metre high grass including brushwood, gorse, bracken, overgrown areas of vegetation, and even create fire breaks in dry environments.

The Climber range will mow into places even a tractor won't go, extending your mowing as well as your safety. Highly productive in areas with restricted access or in situations where hand held trimmers or walk-behind mowers would prove slow or would be labour intensive.

The Climber range takes safety to a new level with its low slung design, central weight distribution and low centre of gravity. Both the 7 Series and 9 Series give you complete control and safety over your mowing experience. Designed to mow up, down, and across steep slopes, the Climber mows places your old ride on mower couldn't even reach.

The Climber Magnum incorporates all the above power and steep gradient mowing features with a durable Multi-Purpose (MP) 130cm finishing deck. This is perfect for owners with larger, steeper properties who want an attractive quality finish for their lawn.

The MP deck can rear-discharge as well as mulch and is also available as an optional extra on all 9 Series machines for owners who wish to move to a higher quality finish after perhaps breaking in their property.

Safety, Stability, and Performance in Tough Conditions. Grillo Climber.

- *A family friendly, safer way to mow due to an extremely low centre of gravity and ground hugging profile.*
- *Extends your mowing due to its ability to handle rough, steep terrain and mow not only short but also very long grass.*
- *Highly effective front brakes (not on CL7.10) for controlling the descent and bringing the machine to a halt on steep slopes.*
- *Mow anytime – tractor wheel grip and differential lock (not on CL7.10) allow you to mow all year round even across slopes when wet and slippery.*
- *Mow when it suits you – the Climber's ability to mow any length grass means you don't have to worry if you miss a mowing cycle.*
- *Heavy duty hydrostatic transmission for easy operation and greater reliability.*
- *Ability to fit rear dual wheels (on 9 series) for extra stability and traction on steep slopes, as well as an optional tow bar for light towing.*
- *Highly manoeuvrable two wheel drive with light weight rack and pinion steering and small turning circle radius.*
- *Low noise levels – kinder on you and the people around you.*
- *Ergonomic, Italian design and aesthetics makes the Climber attractive to look at, and comfortable to drive.*

Grillo

Climber

Climber 7 Series

The **Climber 7 Series** range has been designed for smaller lifestyle properties where it may not be so rough underfoot. Available in three configurations – the entry level Climber 7.10 with a 78cm cutting width and turf wheels and the more advanced Climber 7.13 and Climber 7.16 with 85cm cutting width and tractor wheels. 7 series Climbers are available in either 13.5hp or 16hp engine options and are also fitted with a powerful headlight for mowing in fading light conditions.

The **Climber 7 Series** will tackle terrain types and long grass that your old mower couldn't cope with and will allow you to mow safely in damp and slippery conditions. The Climber 7.13 and CL7.16 also feature tractor type wheels, **differential lock** for providing better traction and **front brakes** for instant stopping. Built robustly, 7 series Climbers will give you years of trouble free running with normal maintenance.

The **Climber 9 Series** is the ultimate mower for heavy duty use on big blocks. Designed where maximum performance is required on difficult, sloping, uneven terrain where it might be rough underfoot. With 91cm cutting width as standard, the Climber 9 Series will handle rough terrain, over metre high grass, and steep slopes. The Climber 9 Series comes in three models to suit your application. Choose between the 16hp and 21hp Twin Vanguard engines depending on the size of your property. For a manicured lawn area, the Climber Magnum features the multi-purpose 130cm three bladed deck providing a quality finish. All 9 series Climbers feature tractor type wheels, **differential lock** for providing better traction and **front brakes** for instant stopping.

Climber 9 Series

Tough conditions present little challenge to Grillo Climbers. Their low slung well balanced design with low centre of gravity provides the safest mowing solution for you and other family members who wish to help with mowing tasks. Grillo Climber – it's all about safety for you and your family!

For testimonials and short movies visit www.grillo.com.au or www.grillo.co.nz

Differential Lock

Engaged by foot pedal to provide traction on driving wheels when travelling across slopes or in slippery conditions.

Front Drum Brakes

Halts the machine on steep slopes for increased safety.

Optional Dual Wheels/Tow bar

For increased stability on 9 series machines when working across slopes/Tow bar available as option for light towing.

Optional Multi Purpose (MP Deck 130cm)

The 1.3 metre MP deck can be fitted to all 9 Series models. Designed for a quality finish on lawn with rear discharge and removable mulching baffle.

Swinging Front Axle

Heavy duty front axle pivots to keep all four wheels on the ground. Rack and Pinion steering with increased manoeuvrability.

CONTROLS: EASY TO USE WITH ERGONOMIC POSITIONING

BLADE ENGAGEMENT

Electromagnetic clutch engages blades and ensures long belt life (on 9 series machines).

HYDROSTATIC TRANSMISSION

Forward, reverse and speed over the ground operated by a single hand control lever.

ADJUSTABLE CUTTING DECK

4 positions plus one for transportation.

ADJUSTABLE STEERING WHEEL

With steering ball grip for easy manoeuvring.
